1. Introduction:

This Action Plan is to be used as a guide for Head Teachers, teachers and other teaching staff to assist planning out an approach for Live Lessons; this would be used for pupils either self-isolating at home or where a member of staff is self-isolating.

Where pupils are self-isolating at home, but are otherwise well, it is the preferred option that they remote into a lesson where possible. Where a pupil is unable to remote into the lesson, the school should consider other options i.e. posting relevant class material to the pupil and or, posting relevant class materials online.

Where a member of staff is self-isolating at home, but are well, it is the preferred option that they remote into the class and continue to teach online with another member of staff available to support giving out materials and behaviour during the session/s.

During the Pentecost and Advent terms of 2020, the Trust IT Director arranged CPD for teachers through Tablet Academy. The DPS is also ran practical CPD to all IT coordinators and then for all other staff to demonstrate how live streaming works in practice. There will be on-going support for any staff who require further CPD. Relevant materials have also been given out to IT Coordinators and Head Teachers to support in-house CDP.

Schools have ensured through their IT Support, that all pupils have their own school MS teams Account; this will support any GDPR issues with sharing personal emails. The Trust IT Director is working alongside school IT support to implement this as quickly as possible.

Once pupils have their own Teams accounts, it is important for staff to teach them how to use Teams; this could be in small groups or as a whole class depending on the number of devices available. Pupils should become familiar with the Teams icon and understand where and how they can access a remote live lesson. They will also need to be taught where to access materials if this has changed from previously arrangements i.e. if the school are now using Teams to post online materials.

2. Expectation for 'live' lessons. (See OLOL online teaching protocol policy document for more information).	
<p>Scenario A: Teacher in class, children at home</p>	<p>Scenario B: Teaching from home</p>
<ul style="list-style-type: none"> • Begin with teacher input lasting approximately 10-15mins. • Provide work through the Class Teams folders • Pupils work for approximately half an hour. • Class TA to support pupils who are learning at home by checking in on this group part way through their independent learning activity. • Teacher to come back to the group at home to ask if there are any questions or concerns; pupils can share work with the teacher so that he/she can give verbal feedback and make any corrections required. • Safeguarding: when pupils working at home are completing independent work during the lesson, face the laptop away from the main class and 'mute' the class. Check occasionally whether these pupils have any questions about their learning. During the lesson, only use children's first names. If you are concerned about a pupils behaviour on line, you can mute and turn off their video; this behaviour would then be dealt with under the Behaviour policy and a conversation with the pupils parents should take place. • Please also see the Trust Protocol for Live Lessons. 	<ul style="list-style-type: none"> • Begin with a teacher input lasting approximately 10-15 minutes. • Teacher to provide work/worksheets which the TA will be required to print and give out. • Pupils to work independently for approximately 30 minutes. • Teacher should call small groups to the carpet to check their understanding of the tasks set. • TA would support the behaviour management of the class and ensure that pupils were completing work. • Pupils should be encouraged to mark their own work as much as possible during the lesson as per the schools own Risk Assessment.
